

Poster List

Poster No.	Name	Institution	Affiliation	Presentation Title	Page
1	Takuma Hori	The University of Tokyo	Department of Mechanical Engineering	Influence of pore size distribution on gas transport in porous media	21
2	Hironobu Matsuzaki	The University of Tokyo	Department of Mechanical Engineering	Manipulation of Microbubble Clusters Using Focused Ultrasound	22
3	Dong Hyun Yoon	Waseda University	Faculty of Science and Engineering	Simple formation of complex cross-sectional flow using multi-stacked three-dimensional PDMS structures	23
4	Daiki Tanaka	Waseda University	Research Organization for Nano & Life Innovation	Crystallization of Zinc(II) Complex Containing Lysozyme by Super Water Repellent Umbrella Pillar Array	24
5	Hikaru Tamura	University of Electro-Communications	Institute for Laser Science	Quantum Ising dynamics with Rydberg atoms in 2D arrays	25
6	Nobuhisa Ata	Tokyo Institute of Technology	Department of Mechanical Engineering	Carbon Nanotube-Engineering Plastic Composite Films Deposited by Low-Pressure Cold Spray Technique	26
7	Mizuho Matoba	The University of Tokyo	Department of Physics	Generating Terahertz Pulses with Intense Longitudinal Electric Fields	27
8	Daisuke Yuhara	Keio University	Department of Mechanical Engineering	Prediction method of phase equilibrium conditions for methane hydrate multiphase system by molecular dynamics simulations	28
9	Takuma Nozawa	Keio University	Department of Mechanical Engineering	Molecular Simulation study on anisotropic interactions on phase behavior of chiral liquid crystals	29
10	Kei Yamaguchi	Keio University	School of Integrated Design Engineering	Self-Assembly of Colloidal Particles on GeSbTe Substrate Induced by Laser Heating	30
11	Hiroyuki Kuwae	Waseda University	School of Fundamental Science and Engineering	Effects of surface modification on flexible woody carbon materials by vacuum ultraviolet treatment	31
12	Hongxiang Lin	The University of Tokyo	Department of Mechanical Engineering	Ultrasound computed tomography with the ring transducer using contrast source inversion: Data processing and experimental results	32
13	Clement Louis Delacou	The University of Tokyo	Department of Mechanical Engineering	Polymeric p-Type Dopant showing Permanent Doping Durability for Transparent Carbon Electrodes	33
14	Eiji Kajikawa	University of Electro-Communications	Institute for Laser Science	Dual-wavelength-pumped Tm ³⁺ -doped ZBLAN fiber MOPA at 813 nm	34
15	Yurina Michine	University of Electro-Communications	Institute for Laser Science	High efficiency and high damage threshold gas grating for ultra-high power laser system	35
16	Haosheng Lin	The University of Tokyo	Department of Mechanical Engineering	Understanding Efficiency Enhancement in Solution-Processed C60/C70 Mixed Fullerenes Perovskite Solar Cells	36
17	Farrabi Sobhi	Keio University	Graduated School of Science and Technology	Coding two-dimensional images into mode spectrum of silicon microcavity covered with a phase-change layer	37
18	Tomohiro Ishida	The University of Tokyo	Department of Applied Physics	Measurement of nonlinear absorption and scattering by calorimetric measurement in PPMg:SLT with 532 nm CW laser	38
19	Akihisa Kondo	The University of Tokyo	Department of Applied Physics	Development of a method for microscopic observation with focused radially polarized beam	39
20	Vipin Kumar	The University of Tokyo	Department of Aeronautics and Astronautics	Polyaniline: An all polymeric new lightning strike protection material for CFRP & GFRP composites	40
21	Abhishek Dinesh Thote	The University of Tokyo	Department of Mechanical Engineering	Achieving Stable and High Performance Perovskite Solar Cells using High-Working-Pressure Sputtered ZnO Electron-Transporting Layer	41
22	Shotaro Kitajima	University of Electro-Communications	Institute for Laser Science	Kerr-Lens Mode-Locked Yb:Lu2O3 Ceramic Thin-Disk Laser	42
23	Masaki Nakamura	Keio University	Graduated School of Science and Technology	Spectral control of surface phonon polariton using phase change material for tunable surface enhanced infrared spectroscopy	43
24	Varun Jadon	The University of Tokyo	Department of Mechanical Engineering	Flow dynamics of coalescing and non-coalescing bubbles in a vertical channel	44
