Conversation The development of patient-friendly medical devices

contents

| A conversation with collaborating researchers

- 01** A non-invasive ultrasonic diagnosis/treatment integration system for diagnosing and destroying tumors and calculi using ultrasound
Mamoru Mitsuishi, Yoichiro Matsumoto

| Young researchers shouldering the future

- 05** Research studying phenomena in extended nano space with emphasis on applications
Erik Einarsson

| Activity report

- 07** PBL lectures including plans and proposals for research projects
10 Opening Report on the 7th Meeting of the Society of Nano Science and Technology
